

HackSoc - Initial Handover Discussion

03/04/2025

Points Of Discussion

- Handover
- HackNotts
- Other

Attendance

- Alex
- Eva
- Indraneel
- James
- Joel
- Lana
- Liz
- Manasi
- Nishi
- Oli
- Qiang
- Sammy
- Trey
- Will Rostance
- Will Wright

Meeting Minutes

- **Handover**
 - *Overview*
 - Some time between Easter and summer.
 - Training modules on UONSU website that must be completed before you can be added to committee officially.

- A series of multiple choice questions directly based on information you're given, not meant to catch you out.
 - You can access things like the event form from the SU dashboard.
- *Role Questions*
 - Alex asked Indra if there would be an infrastructure document.
 - Later James arrived and said there will be a document, likely sometime soon.
 - The plan is to give new Dev Secs their HackSoc stuff before the others, and then let the Dev Secs add the other committee members (as training).
 - Joel asked about the GitHub
 - Old committee members need to be removed before new members can be added.
 - Trey asked if there was anything to be aware of wrt. speaker acquisition secretary.
 - Nishi explained that you contact people to do speaker talks, and you can ask committee what they want to see.
 - There can also be student talks e.g. dissertation, but ironically, students are often too busy with academics to do talks about academics.
- **HackNotts**
 - Lana explained HackNotts - “big event, cost lots of money”
 - Lana and Nishi will be lead organisers.
 - We have enough organisers as of the form closing yesterday, but non-organising committee are encouraged to volunteer - applications will open later in the year.
 - Will Rostance can go and get the SU card from Portland to buy stuff for HackNotts.
 - If you know anyone who could sponsor e.g. nepotism, please reach out so we can have lots of sponsors and make lots of money.
 - There will be a HackNotts organiser meeting where specifics are discussed in more depth.
- **Other**
 - *Preliminary Event Ideas*
 - These are not set in stone - just sharing for fun
 - *Blender workshop* - *Will Wright*
 - Would be useful for those with gamedev interest.
 - *Game Jam* - *Nishi*

- Qiang told us we had one in 2023, but no one did it. Likely due to poor communciation - announced right after another event so could've been missed.
 - We could raise awareness for Game Jams Hackathon style - letting people know about non-HackSoc events so they can form teams.
- *Misc*
- We agreed that the peak district is a fate worse than death - one that Harry has met with. General sadness at his fate.
 - A RoboNotts crossover event was briefly discussed.
 - We also talked about the Switch 2.
